

# N125 SERIES THERMOSTATIC STEAM TRAPS

**Pressures to 125 PSIG (8.75 barg)**  
**Temperatures to 400°F (204°C)**

## Applications

- Steam Tracing
- Drip Legs
- Automatic Air Vents
- Sterilizers
- Cooking Kettles
- Water Heaters
- Laundry Equipment
- Radiators
- Process Equipment
- Air Handlers

## Options *See page 8*

- ST - Sterilizer Trim (with Monel Bellows only)
- SLR - SLR Orifice
- S - Internal Stainless Strainer
- ISO - ISO Filled Actuator
- FC - Fail Closed
- FO - Fail Open

Canadian Registration # 0E0591.9

**Superior Performance** — Hardened valve and seats are lapped in matched sets, providing tight shutoff and long service life.

**Improved Energy Savings** — Maximum elimination of air and non-condensibles—trap closes at saturated steam temperature.

**Temperature Sensitive Actuators** — One moving part. Monel actuator for caustic corrosion resistance. Choose Stainless Steel, fail open, welded actuator for maximum corrosion, thermal and hydraulic shock resistance.

**Freeze Proof** — Threaded male union horizontal inlet and vertical outlet—self draining.

**In-line Maintenance** — Threaded cover for one step removal, inspection and service without breaking pipe connections.

**Air Vent** — Efficient steam service air vent when equipped with ISO Bellows and installed in air vent location.

**Guaranteed** — Traps guaranteed against defects in materials or workmanship for 3 years.

## Models

- **N125-FC**—Standard capacity, fail closed
- **N125-FO**—Standard capacity, fail open
- **N125L-FC**—Low capacity, fail closed
- **N125L-FO**—Low capacity, fail open
- **N125HC-FC**—High capacity, fail closed
- **N125HC-FO**—High capacity, fail open
- **N125ST-FC**—Standard capacity w/sterilizer seat, fail closed

## Operating Principle

Thermal actuator is filled at its free length with a liquid having a lower boiling point than water. On start-up, valve is normally open. When steam enters trap, thermal actuator fill vaporizes to a pressure higher than line pressure. This forces valve into seat orifice to prevent any further flow. As condensate collects, it takes heat from thermal actuator, lowering internal

pressure. Line pressure will then compress thermal actuator to open valve and discharge condensate. Valve opening automatically adjusts to load conditions from minimum on very light loads to full lift at maximum load. Restricted orifice in N125L (small opening at bottom of valve seat) prevents trap from discharging continuously on light loads.

# N125 SERIES THERMOSTATIC STEAM TRAPS

## Typical Specification

Steam trap shall be of balanced pressure design with stainless steel welded actuator capable of discharging condensate within 10°F of saturated temperature. Where greater sensitivity is required, SLR orifice and Sterilizer trim will be available to allow condensate evacuation at or near saturated temperatures. Where subcooling of condensate is desired alternate thermostatic actuator will be available to allow condensate evacuation at or near 40°F below saturated temperatures. Thermostatic actuator shall employ a conical valve lapped in matched sets with the seat ring assuring tight shut off. A minimum of three orifice sizes shall be available allowing for custom capacity sizing. Trap shall be bronze bodied suitable for pressures through 125 psig and available in 3/8" through 3/4" NPT connections.

## Maximum Operating Conditions

PMO: Max. Operating Pressure 125 psig (8.75 barg)  
TMO: Max. Operating Temperature 400°F (204°C)  
PMA: Max. Allowable Pressure 125 psig (8.75 barg)  
TMA: Max. Allowable Temperature 400°F (204°F)

## Materials of Construction

Body & Cover: ASTM B283 C37700  
Actuator: Welded Stainless Steel  
Cover Gasket: Copper Jacketed  
Valve & Seat: Hardened 416 Stainless Steel

Connections: 3/8"-3/4" NPT

## Dimensions

Size	Inch (mm)				Weight lb (kg)
	A	B	C	D	
3/8, 1/2"	2 3/4 (70)	1 1/8 (29)	2 7/8 (73)	2 5/32 (54)	1.5 (.68)
3/4"	3 3/16 (81)	1 9/16 (40)	3 (76)	2 5/32 (54)	1.8 (.82)

## Maximum Capacity—lbs/hr 10°F Below Saturation (Kg/hr 5°C Below Saturation)

Trap	Orifice Inch (mm)	Differential PSIG (barg)					
		5 (0.34)	10 (0.7)	20 (1.4)	50 (3.5)	100 (6.9)	125 (8.6)

Nicholson recommends ISO filled Actuator for superheated steam.

## N450 SERIES THERMOSTATIC STEAM TRAPS

**Pressures to 450 PSIG (31 barg)  
Temperatures to 600°F (316°C)**

### Applications

- Unit Heaters
- Air Vents
- Steam Tracing
- Drip Legs
- Platen Presses
- Plating Tanks
- Sterilizers
- Tire Presses
- Cooking Equipment
- Laundry Equipment
- Other Process Equipment

### Options *See page 8*

- SK - Skirted Seat\*
- SLR - SLR Orifice
- ISO - ISO Filled Actuator\*
- S - Internal SS Strainer (std. on welded actuator)
- ST - Sterilizer Trim
- SW - Socketweld
- FC - Fail Closed\*
- FO - Fail Open

\*Not available on N451

**Compact** — Easy to Install.

**Inexpensive** — Low initial cost.

**Improved Energy Savings** — High efficiency—maximum elimination of air and non-condensibles.

**Temperature Sensitive Actuators** — One moving part. Stainless Steel, fail open, welded actuator for maximum corrosion, thermal and hydraulic shock resistance.

**Hardened Stainless Steel Valve and Seat** — Long life. Lapped as a matched set for water tight seal.

**Easily Maintained** — Can be inspected and serviced without breaking pipe connections.

**Freeze Proof** — Self draining when installed vertically.

**For Superheated Steam Applications** — Because the trap closes at saturated steam temperature, superheated steam cannot reach trap.

**Air Vent** —Efficient steam service air vent when equipped with ISO filled Actuator and installed in air vent location.

**Guaranteed** — Guaranteed against defects in materials or workmanship for 3 Years.

**Positive Shutoff and Long Life** — Integral Stainless Steel Strainer helps prevent debris depositing on valve and seat.

### Models

- **N451-FO**—Low capacity, fail open
- **N452-FO**—Reduced capacity, fail open
- **N452-FC**—Reduced capacity, fail closed
- **N453-FO**—Standard capacity, fail open
- **N453-FC**—Standard capacity, fail closed
- **N454-FO**—High capacity, fail open
- **N454-FC**—High capacity, fail closed

Canadian Registration # 0E0591.9

### Operating Principle

Thermal actuator is filled at its free length with a liquid having a lower boiling point than water. On start-up, valve is normally open. When steam enters trap, thermal actuator fill vaporizes to a pressure higher than line pressure. This forces valve into seat orifice to prevent any further flow. As condensate collects, it takes heat from thermal actuator, lowering

internal pressure. Line pressure will then compress thermal actuator to open valve and discharge condensate. Valve opening automatically adjusts to load conditions from minimum on very light loads to full lift at maximum load. Restricted orifice in the N451 seat (small opening at bottom of valve seat) prevents trap from discharging continuously on light loads such as are encountered on tracer lines.

# N450 SERIES THERMOSTATIC STEAM TRAPS

## Typical Specifications

Steam trap shall be of balanced pressure design with stainless steel welded actuator capable of discharging condensate within 10°F of saturated temperature. Where greater sensitivity is required, SLR orifice and Sterilizer trim will be available to allow condensate evacuation at or near saturated temperatures. Where subcooling of condensate is desired alternate thermostatic actuator will be available to allow condensate evacuation at or near 40°F below saturated temperatures. Thermostatic actuator shall employ a conical valve lapped in matched sets with the seat ring assuring tight shut off. A minimum of three orifice sizes shall be available allowing for custom capacity sizing. Trap shall be forged carbon steel bodied suitable for pressures through 450 psig and available in 1/2" and 3/4" NPT or socket weld.

## Maximum Operating Conditions

# LIQUIDATOR 450 SERIES UNIVERSAL MOUNT THERMOSTATIC STEAM TRAPS

**Pressures to 450 PSIG (31 barg)**  
**Temperatures to 600°F (316°C)**

**Easily Maintained** — Universal two bolt swivel mounting simplifies removal from system. Kits allow flexibility to replace or rebuild.

**Simple Installation** — Stainless mounting block mounts permanently into system. Trap installs via two bolt universal connection.

**Improved Energy Savings** — High efficiency—maximum elimination of air and non-condensibles.

**Temperature Sensitive Actuators** — One moving part. Stainless Steel, fail open, welded actuator for maximum corrosion, thermal and hydraulic shock resistance.

**Hardened Stainless Steel Valve and Seat** — Long life. Lapped as a matched set for water tight seal.

**Easily Maintained** — Can be inspected and serviced without breaking pipe connections.

**Freeze Proof** — Self draining when installed vertically.

**For Superheated Steam Applications** — Because the trap closes at saturated steam temperature, superheated steam cannot reach trap.

**Air Vent** —Efficient steam service air vent when equipped with ISO filled Actuator and installed in air vent location.

**Guaranteed** — Traps are guaranteed against defects in materials or workmanship for three years.

**Positive Shutoff and Long Life** — Integral Stainless Steel Strainer helps prevent debris depositing on valve and seat.

### Models

- **UMT451T-FO**—Low capacity trap w/welded SS actuator
- **UMT452T-FO**—Reduced capacity trap w/welded SS actuator
- **UMT453T-FO**—Standard capacity trap w/welded SS actuator
- **UMTC**—Standard connector
- **UMTCY**—Connector w/Y strainer
- **UMTCYR**—Right Hand Connector w/Y strainer
- **UMTCYL**—Left Hand Connector w/Y strainer

For complete unit, order trap and connector as separate items.

### Operating Principle

Thermal actuator is filled at its free length with a liquid having a lower boiling point than water. On start-up, valve is normally open. When steam enters trap, thermal actuator fill vaporizes to a pressure higher than line pressure. This forces valve into seat orifice to prevent any further flow. As condensate collects, it takes heat from thermal actuator, lowering

internal pressure. Line pressure will then compress thermal actuator to open valve and discharge condensate. Valve opening automatically adjusts to load conditions from minimum on very light loads to full lift at maximum load. Restricted orifice in UMT451T (small opening at bottom of valve seat) prevents trap from discharging continuously on light loads such as are encountered on tracer lines.

## TA SERIES THERMOSTATIC STEAM TRAPS

**Pressures To 650 PSIG (44.8 barg)**  
**Temperatures to 750°F (400°C)**

**Sealed Stainless Steel Body** — Lightweight, compact and corrosion resistant. No bolts or gaskets. Eliminates body leaks.

**Self Centering Valve** — Leak tight shutoff. Improved energy savings. Assembly of actuator and valve to impingement plate allows valve to self-align with center of valve seat orifice. Provides long lasting valve and seat.

**Temperature Sensitive Actuators** — One moving part. Stainless Steel, fail open, welded actuator for maximum corrosion, thermal and hydraulic shock resistance. Optional fail closed available.

**For Superheated Steam Applications** — Because the trap closes at saturated steam temperature, superheated steam cannot reach trap.

**Thermal and Hydraulic Shock Resistant** — Impingement plate plus welded construction prevent damage to actuator.

**Hardened Stainless Steel Valve and Seat** — Long life. Lapped as a matched set for water tight seal.

**Inexpensive** — Low initial cost.

**Maintenance Free** — Sealed unit. Replacement traps cost less than repair of more expensive in-line repairable traps.

**Freeze Proof** — Self draining when installed vertically.

**Directional Discharge** — Pipe thread erosion prevented by directing discharge to center of pipe.

**Air Vent** — Efficient steam service air vent when equipped with ISO Bellows and installed in air vent location.

**Guaranteed** — Guaranteed against defects in materials or workmanship for 3 Years.

### Models

- **TA502-FO**—Reduced capacity, fail open

### Operation

Thermal actuator is filled at it's free length with a liquid having a lower boiling point than water. As assembled, valve is normally open. When very hot condensate enters trap, thermal actuator fill vaporizes to a pressure higher than line pressure. This forces valve into seat orifice to prevent any further flow. As condensate collects, it takes heat from the actuator, lowering internal pressure. Line pressure

will then compress thermal actuator to open valve and discharge condensate. Valve opening automatically adjusts to load conditions from minimum on very light loads to full lift at maximum load. Restricted orifice in TA502 (small opening at bottom of valve seat) prevents trap from discharging continuously on light loads such as are encountered on tracer lines.

# TA SERIES THERMOSTATIC STEAM TRAPS

## Typical Specification

Steam trap shall be of balanced pressure design with stainless steel welded actuator capable of discharging condensate within 10°F of saturated temperature. Where greater sensitivity is required or protection from flash steam locking, a SLR orifice will be available to allow condensate and flash steam evacuation at or near saturated temperatures. Where subcooling of condensate is desired alternate thermostatic actuator will be available to allow condensate evacuation at or near 40°F below saturated temperatures. Thermostatic actuator shall employ a conical valve lapped in matched sets with the seat ring assuring tight shut off. A minimum of three orifice sizes shall be available allowing for custom capacity sizing. Trap shall be stainless steel bodied suitable for pressures to 650 psig and available in 3/8" through 1" NPT or socketweld.

## Operating Principle

Thermal actuator is filled at its free length with a liquid having a lower boiling point than water. On start-up, valve is normally open. When steam enters trap, thermal actuator fill vaporizes to a pressure higher than line pressure. This forces valve into seat orifice to prevent any further flow. As condensate collects, it takes heat from thermal actuator, lowering internal

**Positive Shutoff** — Valve and seats are lapped in matched sets, providing tight shutoff for light and no-load conditions which results in improved energy savings.

**Freeze Proof** — Self draining when installed vertically.

**Compact—Easy to Install** — Ample extension for pipe wrench provided.

**Easily Maintained** — Actuator element and valve are attached to cover to facilitate inspection and servicing. Optional stainless blowdown valve permits easy strainer cleaning while in service.

**Directional Discharge** — Pipe and thread erosion prevented by directing condensate to center of discharge pipe.

**Hardened Stainless Steel Valve and Seat** — Long life. Lapped as a matched set for water tight seal.

**Temperature Sensitive Actuators** — One moving part. Stainless Steel, fail open, welded actuator for maximum corrosion, thermal and hydraulic shock resistance. Optional fail closed Monel bellows.

**Positive Shutoff and Long Life** — Integral Stainless Steel Strainer helps prevent debris from depositing onto valve and seat.

**Guaranteed** — Traps are guaranteed against defects in materials or workmanship for 3 years.

## Models

- **N651-FO**—Y pattern body w/strainer and blowdown port tapped & plugged; low capacity, fail open
- **N652-FO**—Reduced capacity, fail open
- **N652-FC**—Reduced capacity, fail closed
- **N653-FO**—Standard capacity, fail open
- **N653-FC**—Standard capacity, fail closed
- **N654-FO**—High capacity, fail open
- **N654-FC**—High capacity, fail closed

pressure. Line pressure will then compress thermal actuator to open valve and discharge condensate. Valve opening automatically adjusts to load conditions from minimum on very light loads to full lift at maximum load. Optional blow-down valve allows fast and easy cleaning of internal strainer without removing trap from operation.

# N650 SERIES THERMOSTATIC STEAM TRAPS

## Typical Specification

Steam trap shall be of balanced pressure design with stainless steel welded actuator capable of discharging condensate within 10°F of saturated temperature. Where greater sensitivity is required or protection from flash steam locking, a SLR orifice will be available to allow condensate and flash steam evacuation at or near saturated temperatures. Where subcooling of condensate is desired alternate thermostatic actuator will be available to allow condensate evacuation at or near 40°F below saturated temperatures. Thermostatic actuator shall employ a conical valve lapped in matched sets with the seat ring assuring tight shut off. A minimum of three orifice sizes shall be available allowing for custom capacity sizing. Trap shall be forged carbon steel Y pattern body with strainer and available blow down valve suitable for pressures to 650 psig and available in 1/2" and 3/4" NPT or socketweld.

## Maximum Operating Conditions

### Traps with Welded Stainless Actuator

PMO: Max. Operating Pressure	500 psig	(34.5 barg)
TMO: Max. Operating Temperature	600°F	(316°C)
PMA: Max. Allowable Pressure	650 psig	(44.8 barg)
TMA: Max. Allowable Temperature	750°F	(400°C)

### Traps with Welded Stainless Actuator, ISO

PMO: Max. Operating Pressure	650 psig	(44.8 barg)
TMO: Max. Operating Temperature	650°F	(343°C)
PMA: Max. Allowable Pressure	650 psig	(44.8 barg)
TMA: Max. Allowable Temperature	750°F	(400°C)

**SHOWN WITH OPTIONAL BLOWDOWN VALVE**  
**WEIGHT: 5 LBS. (2.3 KG)**

**Connections:**  
1/2" or 3/4" NPT or socketweld

## Materials of Construction

Body & Cover:	ASTM A105 Forged Steel
Actuator:	Welded SS
Cover Gasket:	304 stainless spiral wound w/graphite fill
Strainer:	.033 perf. 304 Stainless Steel
Blowdown Valve:	416 Stainless Steel
Valve & Seat:	Hardened 416 Stainless Steel

## Maximum Capacity—lbs/hr 10°F Below Saturation (Kg/hr 5°C Below Saturation)

N654	5/16 (8)	860 (390)	1220 (554)	1725 (783)	2725 (1237)	3575 (1623)	3850 (1748)	4090 (1857)	4505 (2045)	4850 (2202)	5155 (2340)	5425 (2463)	5675 (2576)	5900 (2679)	6110 (2774)	6310 (2868)	6480 (2945)	6625 (3011)

Nicholson recommends ISO filled Actuator above 500 psi (34.5 barg) and for superheated steam.  
Nicholson recommends skirted seat above 300 psi (20.7 bar).

Shown in AHV Configuration

## ACHIEVER "A" SERIES THERMOSTATIC STEAM TRAPS

**Pressures To 200 PSIG (13.8 barg)  
Temperatures to 400°F (204°C)**

### Applications

- Unit Heaters
- Sterilizers
- Air Vents
- Autoclaves
- Dry Kilns
- Dryers
- Flash Tanks
- Small Heat Exchangers
- Plating Tanks
- Cookers
- Kettles
- Other Process Equipment

### Options *See page 8*

- ST - Sterilizer Trim
- SLR - SLR Orifice
- HC - High capacity orifice

**Actuator Construction** — Internal guide rod and tube for vibration resistance and positive valve to seat alignment.

**Improved Energy Savings** — Maximum elimination of air and non-condensibles—trap closes at saturated steam temperature.

**Compact** — Requires minimum space and provides condensate capacities equal to larger mechanical traps.

**Freeze Proof** — Type A with horizontal inlet and vertical outlet. Type AHV when installed vertically (outlet down) or horizontally on side (cover perpendicular to ground).

**Renewable In-line** — With factory packaged, precision matched internal parts kits.

**Superior Performance** — Fast response to changing pressure and condensate loads. Maximum air handling capability.

**Air Vent** — Efficient steam service air vent when equipped with ISO filled actuator and installed in air vent location.

**Guaranteed** — Guaranteed against defects in materials or workmanship for 3 Years.

### Models

- **A33**—1/2" right angle trap
- **A43**—3/4" right angle trap
- **A53**—1" right angle trap
- **AHV33**—1/2" straight thru trap
- **AHV43**—3/4" straight thru trap
- **AHV53**—1" straight thru trap

\*Add "HC" to all the above for high capacity.

Canadian Registration # 0E0591.9

### Operating Principle

Thermal actuator is filled at its free length with a liquid having a lower boiling point than water. On start-up, valve is normally open. When steam enters trap, thermal actuator fill vaporizes to a pressure higher than line pressure. This forces valve into seat orifice to prevent any further flow. As condensate collects,

it takes heat from thermal actuator, lowering internal pressure. Line pressure will then compress thermal actuator to open valve and discharge condensate. Valve opening automatically adjusts to load conditions from minimum on very light loads to full lift at maximum load.

# ACHIEVER "A" SERIES THERMOSTATIC STEAM TRAPS

## Typical Specifications

Steam trap shall be of balanced pressure design with stainless steel welded actuator capable of discharging condensate within 10°F of saturated temperature. Where greater sensitivity is required, SLR orifice and Sterilizer trim will be available to allow condensate evacuation at or near saturated temperatures. Thermostatic actuator shall employ a conical valve lapped in matched sets with the seat ring assuring tight shut off. A minimum of two orifice sizes shall be available allowing for custom capacity sizing. Trap shall be bronze bodied suitable for pressures through 200 psig and available in 1/2" through 1" NPT connections.

## Maximum Operating Conditions

PMO: Max. Operating Pressure 200 psig (13.8 barg)  
TMO: Max. Operating Temperature 400°F (204°C)  
PMA: Max. Allowable Pressure 200 psig (13.8 barg)  
TMA: Max. Allowable Temperature 400°F (204°C)

Connections: 1/2" - 1" NPT
